20. STATIONERY,
Pens.

N° 16,041 A.D. 1891

Date of Application, 22nd Sept., 1891—Accepted, 31st Oct. 1891

COMPLETE SPECIFICATION.

Improvements in Pens.

I, WILLIAM HENRY BRISTOL, of 402 Garden Street, Hoboken, in the County of Hudson, and State of New Jersey, in the United States of America, Mechanical Engineer, do hereby declare the nature of this invention, and in what manner the same is to be performed, to be particularly described and ascertained in and by the following statement :—

My invention has reference to improvements in pens, and has for its object to provide a pen which can be manufactured at practically the same cost as heretofore and serves both as a pen and an eraser. To this end my invention consists essentially in providing the pen with a sharpened edge to form an eraser, as fully pointed out in the following Specification and claims and illustrated in the accompanying drawing, in which :—

Figure 1 represents a face view of a pen embodying my invention.

Figure 2 is a section thereof in the plane X X Figure 1.

Similar letters indicate corresponding parts.

In the drawing the letter A designates the body of the pen, which, in the example illustrated, is provided with a laterally projecting portion or ear having its outer edge sharpened to form the blade or eraser B.

In practice I prefer to have the eraser integral with the pen, the whole being struck up from one piece of metal and the eraser ground to a fine edge during the subsequent finishing of the pen.

I do not wish to confine myself to any particular form, or degree of projection, for the eraser, or to any particular location for the same with respect to the body of the pen, since it is evident that the eraser could be formed on either side of the pen, or even on the back thereof, in which latter case it would be made to project at right angles therefrom.

Having now particularly described and ascertained the nature of my said invention and in what manner the same is to be performed, I declare that what I claim is :

1. A pen provided with a sharpened edge to serve as an eraser, substantially as described.

2. A pen provided with an integral projecting portion having a sharpened edge to form an eraser, substantially as described.

Dated this 22nd day of September 1891.

WILLIAM HENRY BRISTOL.
